

CL	IMDS – Checkliste for all Auto-Kabel Supplier		
PPAP		Version 4	Seite 1 von 1

Preface:

Effective June 2000, all OEMs changed their PPAP requirements for material for vehicles produced, to report material content information or parts in the International Material Data System (IMDS). You can prepare the corresponding material data sheets under www.mdssystem.com. Suppliers without an IMDS Approval may not receive a “Full-approved”- PPAP status.

These check list show some items which are to include at the preparation of IMDS – material data sheets for the autokabel company! General and legal requirements stay there from intact on IMDS-entry.

- Material data sheets (MDB´s) are timely to prepare and to send for the publications at the autokabel company (this should happen at least 3 weeks in front of the publication).
- The designation of the entry must be conform to the current drawing or rather the purchasing documents and should carry out in the following language:
 - german supplier make this in german
 - international supplier make this english
- The current Recommendations (particularly the Recommendation 001) have to be exactly taken into account in the IMDS at the entry. You can see this under the menu item “**guidelines**” after to login in the system.
- Send the material data sheets under **our prevailing AK- part numbers** to us. As a general rule exist this number of 5 numbers (for example: 12345 or 00021).
- All material data sheet must be send to the **IMDS-OrgID 645** (AutoKabel company), independent of the publication/delivery at the AutoKabel location/factory!
- The material data sheet must be changed to any modification of the product (for example weight, material, etc.)! For this case change just the version number, the ID-number is the same (for example: of 1234567 / 1 to 1234567 / 2)!
- *All material data sheets may not be deleted any more after sending to the AutoKabel company, independently of their status (accepted, unread)!*

Comments:

Please send contact name, phone number and e-mail address from the responsible person of IMDS in your company. Additional we would need the conformation of compliance of the EU ELV Directive 2000/53/EG.

If you are the distributor and not the producer of the delivered products, so it is your accountability that to enter the material data in the IMDS! The producer can send direct the material data to us. At the dispatch of their material data sheets he must make a reference to your company in the field “Supplier-Number”.

If you have any additional questions or concerns, please feel free to contact Mr. Maik Haase at imds@autokabel.com!
